1. COURSE INFORMATION

During the one-year duration of “Leather Goods Maker” trade, a candidate is trained on Professional Skill, Professional Knowledge and Employability Skill related to job role. In addition to this, a candidate is entrusted to undertake project work, extracurricular activities and on-the-job training to build up confidence. The broad components covered under Professional Skill subject are as below:-

The trainee will learn about safety and environment, use of fire extinguishers, artificial respiratory resuscitation to begin with. They get the idea of trade tools and its standardization. They can select the appropriate leather and verify the characteristics of different fancy and finished leather. They will be able to prepare different sketch & design of various leather goods, identify hides & skins. They can prepare pattern, design & cutting. They will also perform sewing operation using appropriate techniques for assembling and manufacturing of cut edged articles coin purse, key case & gents belt. The trainees will acquire the knowledge of various substitute materials of leather and method of applications and their uses.

The candidate will carry out maintenance of tools and equipment of the section observing safety precaution. They can identify, operate, troubleshoot & maintenance of different tools, machines & equipment used in leather goods making. They will be able to select appropriate leather & ornamental materials and prepare various leather goods by using electrical and hand operated machines observing quality parameters. The trainee will also acquire knowledge of sequence of operation in leather goods productions. They will be able to identify and use different electrical equipment and perform various process (hydraulic cutting and clicking, straps cutting, splitting, embossing, cementing, zigzag sewing and flat bed, post bed stitching).

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under the aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

‘Leather Goods Maker’ trade under CTS is delivered nationwide through a network of ITIs. The course is of one year duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory & Practical) imparts professional skills and knowledge, while the core area (Employability Skill) imparts requisite core skills, knowledge, and life skills. After passing out the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Candidates broadly need to demonstrate that they are able to:

- Read and interpret technical parameters/documents, plan and organize work processes, identify necessary materials and tools;
- Perform tasks with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional skill, knowledge & employability skills while performing jobs.
- Document the technical parameters related to the task undertaken.

2.2 PROGRESSION PATHWAYS

- Can join industry as Leather goods maker and will progress further as Senior leather goods maker, Supervisor and can rise up to the level of Manager.
- Can become Entrepreneur in the related field.
- Can join Apprenticeship programs in different types of industries leading to a National Apprenticeship certificate (NAC).
- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

2.3 COURSE STRUCTURE

Table below depicts the distribution of training hours across various course elements during a period of one year: -

S No.	Course Element	Notional Training Hours
1	Professional Skill (Trade Practical)	840
2	Professional Knowledge (Trade Theory)	240
3	Employability Skills	120
	Total	1200

Every year 150 hours of mandatory OJT (On the Job Training) at nearby industry, wherever not available then group project is mandatory.

On the Job Training(OJT) / Group Project	150
Optional Courses (10th/ 12th class certificate along with ITI certification or add on short term courses)	240

Trainees of one-year or two-year trade can also opt for optional courses of up to 240 hours in each year for 10th/ 12th class certificate along with ITI certification, or, add on short term courses.

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

a) The **Continuous Assessment** (Internal) during the period of training will be done by **Formative Assessment Method** by testing for assessment criteria listed against learning outcomes. The training institute has to maintain an individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in

b) The final assessment will be in the form of summative assessment. The All India Trade Test for awarding NTC will be conducted by Controller of examinations, DGT as per the guidelines. The pattern and marking structure is being notified by DGT from time to time. **The learning outcome and assessment criteria will be the basis for setting question papers for final**

assessment. The examiner during final examination will also check the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects is 33%.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising some of the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work
- Computer based multiple choice question examination
- Practical Examination

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Marks in the range of 60%-75% to be allotted during assessment	

For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices	<ul style="list-style-type: none"> • Demonstration of good skills and accuracy in the field of work/ assignments. • A fairly good level of neatness and consistency to accomplish job activities. • Occasional support in completing the task/ job.
(b)Weightage in the range of 75%-90% to be allotted during assessment	
For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with little guidance, and regard for safety procedures and practices	<ul style="list-style-type: none"> • Good skill levels and accuracy in the field of work/ assignments. • A good level of neatness and consistency to accomplish job activities. • Little support in completing the task/job.
(c) Weightage in the range of more than 90% to be allotted during assessment	
For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.	<ul style="list-style-type: none"> • High skill levels and accuracy in the field of work/ assignments. • A high level of neatness and consistency to accomplish job activities. <p>Minimal or no support in completing the task/ job.</p>

Stitcher (Leather Goods and Garments); also called a ‘sewer’ is an important job role associated with Leather Goods and Garment sector. The primary responsibility of a stitcher is to sew fabric, fur, leather or synthetic materials to produce garments and other articles.

Pattern Maker, Fur; prepares patterns and full-size canvas models of garments and other articles of fur to guide Cutters and Finishers. Draws pattern on paper in accordance with garment design or customer's measurements. Makes canvas model of garment according to pattern. Checks patterns and model for accuracy and makes necessary alterations. Passes them to garment Cutters or Finishers. Examines completed garment for defects. Cuts patterns for fur trimmings, accessories and other fur articles and for alteration of fur articles. May cut patterns for fancy leather goods.

Supervisor and Foreman, Leather Goods Making; supervises manufacture of fancy and other leather goods such as gloves, suitcases, purses, belts, whips, etc. according to customer’s choice or latest designs. Studies designs from catalogue or samples and decides manufacturing process. Arranges for required type and quality of materials and gets working pattern made to suit specifications. Instructs and guides workers as required and ensures correct operations and quality and finish of ultimate product. May specialize in manufacture of any particular items and be designated accordingly.

5. LEARNING OUTCOME

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOMES

1. Select the appropriate leather and verify the characteristics of different fancy and finished leather following safety precautions. (NOS: LSS/N0901)
2. Sketch and design various leather goods, identify hide and skin and make pattern, prepare pattern design and cutting. (NOS: LSS/Q5201)
3. Apply sewing operation using appropriate techniques for assembling and manufacturing of cut edged articles coin purse, key case and gent's belt. (NOS: LSS/N5501)
4. Apply proper process of embossing for finishing leather goods. (NOS: LSS/N5503)
5. Select and perform various small leather measurements to produce different leather goods like wallet, ladies clutch purse and gents belt. (NOS: LSS/N5503)
6. Identify various substitute materials of leather, method of applications and their uses. (NOS: LSS/N5101)
7. Apply method for economical cutting and calculate production cost observing quality control aspect. (NOS: LSS/N5301, LSS/N5302)
8. Take care and Maintain tools and equipment of the section observing safety precautions. (NOS: LSS/N8601)
9. Identify, operate, troubleshoot and maintain different tools, machines and equipment used for leather goods making. (NOS: LSS/Q1801)
10. Select appropriate leather and ornamental materials and prepare various leather goods by using electrical and hand operated machines observing quality parameters. (NOS: LSS/N5501)
11. Apply sequence of operations in leather goods production. (NOS: LSS/Q5201)
12. Identify, operate, troubleshoot and maintain different tools, machines and equipment used for leather goods making. (NOS: LSS/Q1801)
13. Identify and use different electrical equipment and perform various processes (hydraulic cutting and clicking, straps cutting, splitting, embossing, cementing, zigzag swing machine and flat bed, post bed stitching machines.) (NOS: LSS/Q1801)

6. ASSESSMENT CRITERIA

LEARNING OUTCOMES	ASSESSMENT CRITERIA
1. Select the appropriate leather and verify the characteristics of different fancy and finished leather following safety precautions. (NOS: LSS/N0901)	Plan the work in compliance with standard safety procedure.
	Mark as per specification applying desired mathematical calculation and observing standard procedure.
	Identify various types of leather and pre-tanning, tanning, post tanning processes are formulated based on the final characteristics required for the final product.
	Effect of water, acids, alkalis, friction and heat on leather and substitute materials are compared
	Different types of finished leather viz. CG, PG, Fur, Suede leather, Oil pull up, Waxy, Nubuck, Nappa etc. are identified.
2. Sketch and design various leather goods, identify hide and skin and make pattern, prepare pattern design and cutting. (NOS: LSS/Q5201)	Select raw materials and visually inspect for defects.
	Different types of patterns are identified and components are cut by hand or using clicking press.
	Free hand sketching of various basic designs of leather goods is performed.
	Mark the job as per blueprint.
	Patterns and templates are prepared for various leather goods.
	Various methods of construction and edge treatment are performed according to the type of leather goods.
3. Apply sewing operation using appropriate techniques for assembling and manufacturing of cut edged articles coin purse, key case and gent's belt. (NOS: LSS/N5501)	Various grinders, synthetic materials, adhesives used in the leather products are identified.
	Different types of stitching are performed on leather and synthetic materials in combination with leather.
	Various types of adhesives and their application in leather goods manufacture are established.
	Gluing and assembling components.
	Trimming and finishing.
	Use of hole punch, riveting punch, press buttons, punch for fixing key hook.
4. Apply proper process of embossing for finishing leather goods. (NOS: LSS/N5501)	Select required material for antique treatment.
	Prepare required tools, equipment and materials as per applications.

LSS/N5503)	Plan and execute different process of embossing for finishing leather goods.
	Cleaning, polishing and finishing for removal of marks and blemishes from leather are performed.
	Antique treatment, embossing, spirit colour etc. are applied for artistic leather work.
5. Select and perform various small leather measurements to produce different leather goods like wallet, ladies clutch purse and gents belt. (NOS: LSS/N5503)	Measurement of leather for making medium leather goods viz. travel bags, ladies hand bag etc. are performed.
	Costing of products based on measurements are worked out.
	Prepare Cutting components according to patterns.
	Stitching wallet, belt.
	Skiving edges for folding components.
	Prepare cutting strips for required leather and width.
6. Identify various substitute materials of leather, method of applications and their uses. (NOS: LSS/N5101)	The substitute materials for making leather goods are identified and their uses.
	Identify different substitute materials and their uses.
	Apply method of applications for substitute materials.
	Prepare different type edge treatment.
7. Apply method for economical cutting and calculate production cost observing quality control aspect. (NOS: LSS/N5301, LSS/N5302)	Methods for economical cutting of leather, lining and substitute materials.
	Cost sheets are prepared for different leather goods based on the materials consumed and wastage thereof.
	Products are inspected and checked against quality parameters.
	Methods of storage, packing and forwarding of finished products are established.
	Quality check for dimensional accuracy as per standard procedure.
8. Take care and Maintain tools and equipment of the section observing safety precautions. (NOS: LSS/N8601)	Tools, equipment and machineries for making leather goods are identified.
	Handling and maintenance of the tools and machineries with knowledge of the functions of various parts of it are performed.
	Safety signs for danger, warning, caution and personal safety messages are identified.
	Demonstrate safety precautions including firefighting equipment and first aid.

9. Identify, operate, troubleshoot and maintain different tools, machines and equipment used for leather goods making. (NOS: LSS/Q1801)	Convert the prepared circuit into layout diagram.
	Identify various input and output socket connectors of the given machines.
	Explore various troubleshooting and faultfinding the resources provided.
	Identify major section and panel board of the equipment.
10. Select appropriate leather and ornamental materials and prepare various leather goods by using electrical and hand operated machines observing quality parameters. (NOS: LSS/N5501)	Suitability of different types of leathers for various leather goods is established and appropriate leather is selected for the type of leather goods.
	Different types of leather goods are fabricated using manual and machine operations.
	The leather goods are inspected for their quality parameters.
	Select ornamental materials like locks, frames, straps fitting, handle fitting and hooks of different size, shape, style and metal.
	Hinges, clips and fasteners, size and style and rivet buttons use for fixing.
11. Apply sequence of operation in leather goods productions. (NOS: LSS/Q5201)	Identify the different hand tools.
	Selection of proper tools for operation and precautions in operation.
	Selection of different quality leather, grade, size, color and grain matching.
	Plan and organize Cleaning stains and spots, creasing by crazing tools.
	Perform Thread trimming, burning and finishing.
12. Identify, operate, troubleshoot and maintain different tools, machines and equipment used for leather goods making. (NOS: LSS/Q1801)	Working Practice on different hand tools used in the shop.
	Familiarization of operating procedure related to different m/cs & equipment.
	Safety precautions. Its importance, cleanliness of the shops
	Rectification of common machine faults
13. Identify and use different electrical equipment and perform various	Identify different parts and section of clicking machine.
	Operate hydraulic cutting and clicking machine to produce leather goods.

<p>processes (hydraulic cutting and clicking, straps cutting, splitting, embossing, cementing, zigzag swing machine and flat bed, post bed stitching machines.)(NOS: LSS/Q1801)</p>	Identify different parts and operate strap cutting machine with proper sequence.
	Identify different parts and operate strap cutting machine with proper sequence.
	Identify different parts, function and operate splitting machine with proper sequence.
	Identify different parts, function and operate Hydraulic embossing machine with proper sequence.
	Identify different parts, function and operate cementing press machine with proper sequence.
	Identify different parts, function and operate Zig Zag with proper sequence.
	Identify different parts, function and operate bed & post bed stitching machine with proper sequence.
